

CGS Tower Networks is Hiring:

We are looking for a top-notch Sr SW engineer to become a part of a small and very powerful team and to take active part in designing and implementing the company's next generation products.

Requirements:

- 3+ years of experience in QA multidisciplinary, HW & SW, telecommunication systems.
- Hands-on experience and in-depth knowledge of networking and network protocols (familiarity with most or all layers of OSI model).
- Lab deployment – designing and deploying lab topologies to test network behavior.
- Experience with CLI/WEB-UI manual & automation testing.
- Experience in development and management of automation systems.

Advantage:

- B.Sc. in communication systems engineering/computer science or equivalent.
- Experience in development on QualiSystems.
- Experience with GTP/SIP/MPLS networks.
